

Vascular Intervention // Peripheral
Peripheral Multifunctional Catheter/0.014"/0.018"/OTW

Oscar[®]

One Solution: **C**ross. **A**dj. **R**estore.

One solution. Multiple functions.
No compromise

Lesion-specific angioplasty with
length-adjustable balloon

User-adjustable guide wire support
for accessing and crossing lesions

BIOTRONIK
excellence for life

Oscar

The all-in-one solution to reach, cross and prepare lesions.¹

One Solution: Multiple functions

Simplify your approach to a complex problem.

Achieve versatility without compromise. Flexibility, pushability, long or short balloons – use a single system with fully adjustable components to cross and dilate lesions¹ exactly how you want to.

“Oscar is the perfect tool to address all of the challenges in accessing, passing and restoring flow for complex atherosclerotic disease.”

Dr. Koen Deloose, az Sint-Blasius Hospital Dendermonde, Belgium

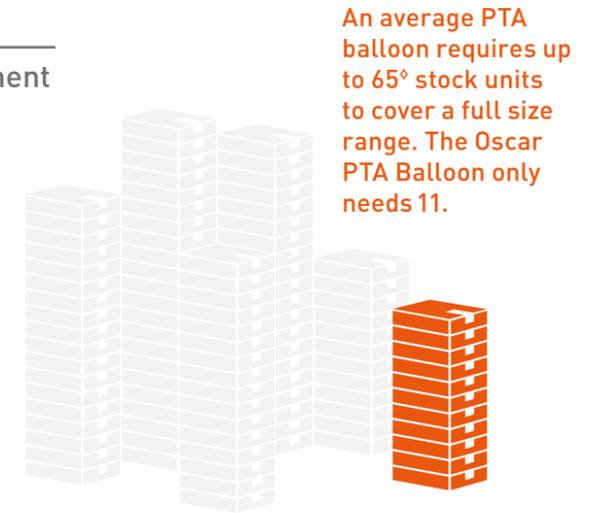

One Solution: Cross. Adjust. Restore.

Achieve more with less. Optimize your stock management and simplify your procedural flow.

Address unmet needs for physicians, administrators and cath lab staff:

- Save valuable shelf space
- Always have the right balloon length on hand
- Simplify ordering and inventory management processes

Up to
83%
stock
reduction

An average PTA balloon requires up to 65° stock units to cover a full size range. The Oscar PTA Balloon only needs 11.

[°]Compared to equivalent available sizes of Passeo®-14 and Passeo®-18 PTA balloons

What are the components of the Oscar Peripheral Multifunctional Catheter?

1. Oscar Support Catheter and extendable Oscar Dilator

Unique adjustable support for pushability and flexibility

2. Oscar Support Catheter and length-adjustable Oscar PTA Balloon

Dilate lesions accurately with just one, length-adjustable, balloon*

Specially designed Lock Grip
Seals and secures for accurate positioning of Oscar Dilator, Oscar PTA Balloon or guide wire. Additionally, enables local contrast media injection with Oscar Dilator and guide wire in place.

*Single Oscar PTA Balloons also available separately. Only to be used with the matching Oscar Support Catheter.

**Balloon \varnothing 2.0 - 6.0 mm: length-adjustable 20 - 180 mm; balloon \varnothing 7 mm: length-adjustable 20 - 100 mm

Oscar

The all-in-one solution to reach, cross and prepare lesions.¹

One Solution: Multiple functions

Simplify your approach to a complex problem.

Achieve versatility without compromise. Flexibility, pushability, long or short balloons – use a single system with fully adjustable components to cross and dilate lesions¹ exactly how you want to.

“Oscar is the perfect tool to address all of the challenges in accessing, passing and restoring flow for complex atherosclerotic disease.”

Dr. Koen Deloosse, az Sint-Blasius Hospital
Dendermonde, Belgium

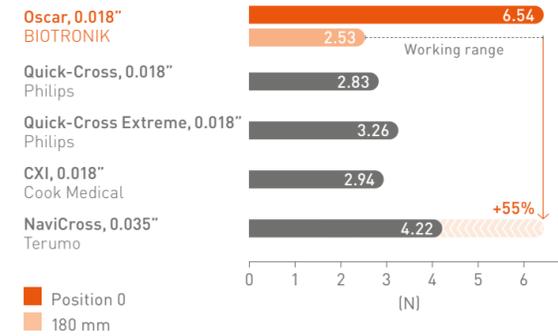

One Solution: Cross. Adjust. Restore.

User-adjustable guide wire support so you can obtain the pushability and flexibility you need

The Oscar Support Catheter allows variable guide wire support for accessing and crossing lesions to reduce the need for guide wire escalation or multiple support catheters.

Achieve the pushability of a 0.035" system on a 0.018" platform²

Oscar Variable Pushability

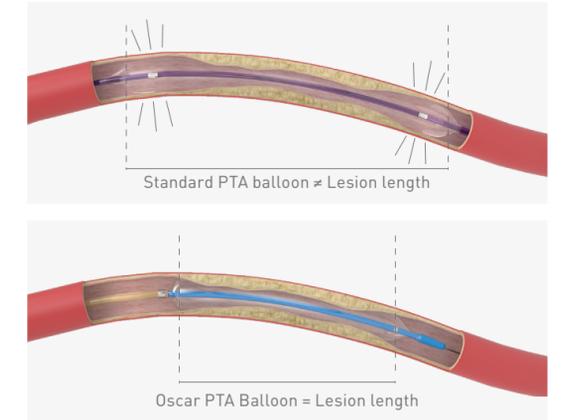

Testing performed with Oscar 0.018/6F Support Catheter + Dilator combination

One Solution: Cross. Adjust. Restore.

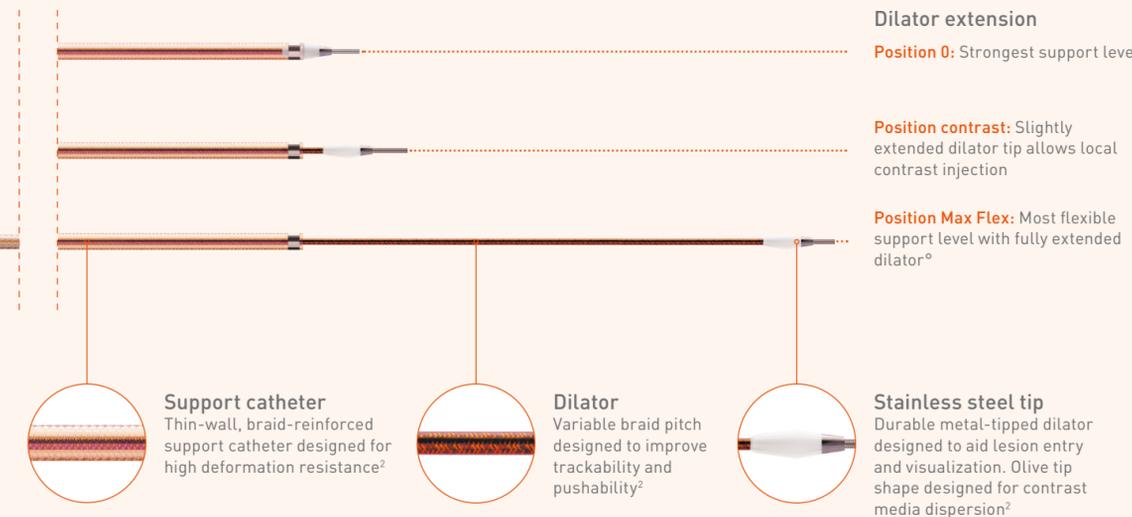

Customize your angioplasty to accurately match the balloon length to lesion length

The unique solution allows in-vessel adjustments of the balloon length from 20 to 180 mm, designed to dilate various lesion lengths or focal residual stenosis with the same balloon.

Match Oscar PTA Balloon to lesion length

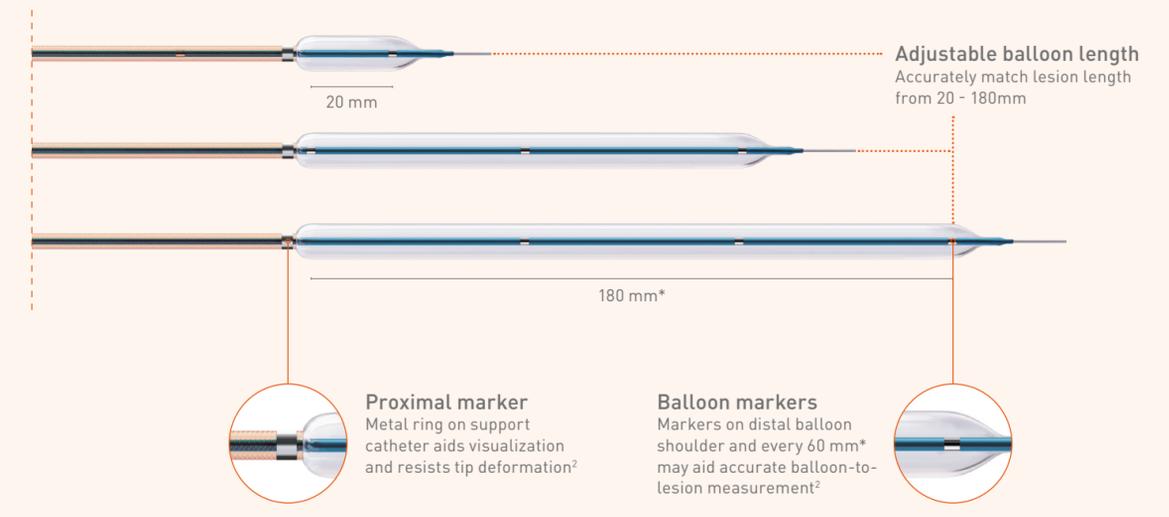

Oscar Support Catheter and Oscar Dilator

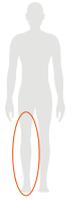

²Dilator extends from 0 - 191 mm.

Oscar Support Catheter and Oscar PTA Balloon

*Balloon ø 7 mm has 2 markers, one distal and one at 50 mm

Indicated for percutaneous transluminal interventions in the peripheral vasculature to provide support during access into and to dilate stenoses in femoral, popliteal and infrapopliteal arteries. The product is also intended for injection of radiopaque contrast media for the purpose of angiography.¹

Technical Data	Balloon catheter	0.014"/4F	0.018"/6F
Catheter type	OTW	OTW	OTW
Recommended guide wire	0.014"	0.018"	0.018"
Tip	Soft and tapered, colored (yellow)	Soft and tapered, colored (blue)	Soft and tapered, colored (blue)
